

Outpatient Endoscopy Quality Indicators

The Oregon Clinic
Portland & West Hills
Gastroenterology
2009 Data

2009 Endoscopy Volume

<u>Procedure</u>	<u>Number</u>	<u>Percent</u>
• Colonoscopy:	17,224	69.5%
• Flex. Sigmoidoscopy:	654	2.6%
• Ileoscopy:	23	0.1%
• Upper Endoscopy:	6,880	27.8%
• Total:	24,781	100%

Colonoscopies per doctor in one year = 615

A higher number is better. Our doctors exceed the minimum recommended number over three times.

(National Benchmark >200)

2009 Screening Colonoscopy Data

- 8448 screening colonoscopies performed
- Average withdrawal time is 11.6 minutes
 - A higher number is better as it indicates that our doctors take their time to perform a good exam. National Benchmark: Greater than 6 minutes
- Average adenoma detection rate is 28%
 - A higher number is better, indicating that our doctors find more precancerous polyps. National Benchmark: 25% for men, 15% for women.
- Cecum attainment rate is 97.5%
 - A higher number is better as it indicates a complete colon exam. National Benchmark: >95%

2009 Colonoscopy Complication Rates

17,224 Colonoscopies:

- Bleeding 0.9/1000
 - A smaller number is better. National Benchmark: 10/1000
- Perforation 0.2/1000
 - A smaller number is better. National Benchmark: 1/1000

Both of these numbers show that the safety record of our doctors far exceeded the benchmarks.
